HEALTH HISTORY

To our patients: Although oral surgeons primarily treat the area in and around your mouth, your mouth is a part of your entire body. Health problems that you may have or medication that you may be taking, could have an important interrelationship with the care, that you will be receiving. Thank you for answering the following questions. Your answers are for our records only and will be considered confidential.

CHRISTOPHER A. BUTTNER, D.D.S. FINANCIAL POLICY AND AUTHORIZATION

- We are happy to file an insurance claim to your primary insurance carrier for you. Please understand that insurance companies rarely reimburse the full amount, usually paying between 50-80% of the cost under the maximum annual benefit (usually \$1000-\$2000) after yearly deductibles have been met by the insured. Also insurance companies do not routinely cover many oral surgery procedures. Therefore, we collect a standard 30% of COVERED benefits for most insurance companies payable on the day of the surgery appointment. Non-covered benefits require payment in FULL prior to the surgical procedure.
 - We will be happy to send a predetermination request to your insurance company. However we will not schedule your surgery appointment until we receive a reply (generally 4-6 weeks).
 - **After** the insurance has paid you will promptly receive a **refund or a bill** whichever is applicable. If you have a balance due after insurance has paid the balance is payable in full within fifteen days of receipt of a statement.
 - If the patient is under 18 years old, please indicate whom the bill or refund should be addressed to:

Name	Address	

- If your insurance company has not reimbursed us in full in 60 days of filing your claim we will send a statement to the responsible party and the unpaid balance becomes due and payable within fifteen days.
- General anesthesia/IV sedation is not usually covered for non-surgical tooth extractions.
- We require payment in full for exam and any X-rays on the day of service.
 - Insurance companies will usually only pay for one or two office visits per year. If you were examined by your general dentist and referred to this office, your exam fee at this office may not be covered.
 - Insurance companies will generally pay for a Panorex X-ray (full mouth/jaw x-ray) every two-five years. If the diagnostic quality of X-ray(s) provided by your general dentist are not acceptable we may require a new X-ray for today's exam visit and it may not be covered by your insurance company.
- Payment in full is required for tooth extraction with local anesthetic when done the same day as the examination.
- Financial arrangements are individualized for every patient for extraction of multiple teeth for the placement of dentures or partials. Insurance benefits are frequently used up for the year with the fabrication of the dentures. Alveoplasty (smoothing of bone for denture placement) is often not a covered expense when performed concurrent with dental extractions. Implant placement may be a covered benefit.
- When a biopsy procedure is performed the specimen will be sent to a lab. You will be billed separately by the lab for their diagnostic services. The Pathology Lab service fees are determined by the pathology lab.
- If you do not provide us with complete and accurate insurance information you will be required to pay for all professional services in full at the time of service.
- Some insurance companies require patients who are full time students over 18 years old to provide a copy of his/her student schedule for the current semester.
- It is our policy to have the insured file all secondary insurance claims. Insurance Company policies regarding secondary insurance coverage is extremely varied and often times ambiguous. As a consequence, we are unable to effectively administer a program to file and resolve secondary insurance claims. We will create a secondary insurance claim for you after the primary insurance has issued an explanation of benefits (EOB).
- We DO NOT accept out of state checks.
- Checks returned due to insufficient funds are assessed a \$30.00 fee.
- A service charge of 1.5% (18%APR) will be charged to outstanding accounts greater than 30 days.
- Outstanding accounts greater than 90 days will be turned over to a collection service for collection.
- Patients wishing to finance treatment fees may be eligible for commercial financing through a financing company. Details available on request.

Please remember that insurance is considered a method of reimbursing the patient for fees paid to the doctor and is not a substitute for payment. Some insurance companies pay fixed allowances for certain procedures and others pay a percentage of the charge. It is your responsibility to pay the
